

PRESS RELEASE Switzerland/Minneapolis November 3, 2006

LEVO Switzerland and Dane Technologies have partnered together to bring a better quality of life to more wheelchair users of every age across the United States.

By combining LEVO's innovative standing technologies with Dane's strong service network the LEVO/Dane Team will offer the U.S. market a complete range of standing solutions backed by seamless service. That will create more opportunities for people to experience the mobility, independence and health benefits achieved through the use of standing wheelchairs.

"The foundation of our partnership is built on our shared values of integrity in all we do and a mutual commitment to standing technology. It will grow through our shared vision to make standing solutions available to all wheelchair users," said Dr. Kurt H. Fischer, founder and owner of LEVO AG.

Thomas Raeber, President of LEVO USA commented: "We are excited about this opportunity to expand our presence in the U.S. Dane brings a great service network and reputation for customer service to our partnership."

"LEVO invented the standing wheelchair in 1975. Since that time they have continued to innovate and deliver leading solutions that combine Swiss engineering and precision with great design and reliability. We are very proud to be associated with LEVO's tradition of excellence and leadership in standing technologies," said Dan Johnson, CEO of Dane Technologies.

LEVO AG (www.levo.ch) is a private owned Swiss company developing, producing and distributing stand-up wheelchairs throughout the world. In 1975 LEVO introduced the first standing wheelchair. Through a strong commitment to continuous innovation, LEVO's current product range includes a full range of manual and powered stand-up wheelchairs for adults and children. LEVO continues its tradition of innovation with the introduction of the first integrated monitor, which allows the user to measure the daily positioning activities.

Dane Technologies (www.danetechnologies.com) is a leading provider of power assist and mobility solutions throughout the world. We help our clients increase safety, productivity, and improve their quality of life.
